

WASTE MANAGEMENT

CONTAINERS FOR WASTE & RECYCLABLES

Waste and recycling management for trade, industry and offices.

What you can expect of us.

In the UK, many millions of tons of waste are produced each year. Environmental pressures across the UK and the rest of the world are now forcing more people to segregate and recycle their waste. These days, almost everything can be recycled, provided the various types of waste are collected and sorted carefully.

Business and facility waste is often by material type such as paper or card, glass, metal and plastics. This practice makes sense not only ecologically, but also financially; it costs little to dispose of recycled, segregated waste however it can be very expensive to discard of waste through landfill. In most cases companies gain enormous cost benefits through the use of sustainable resource management, and at the same time they are also protecting the environment.

Once sorted, recyclable waste is turned into 'genuine' recyclables and the recycling industry can be a lucrative business. In order to take advantage of this, intelligent concepts are needed for corporate waste separation as well as suitable storage and safe transportation of the separated waste. These recyclables, which can be sold at a profit, will reduce the amount of residual waste and consequently the cost of its removal.

The key to implementing a proficient waste management system is superior organisation of waste collection. DURABLE can help improve these processes by offering a variety of functional containers for waste and recyclables.

Premium-quality containers have been developed for many other applications; in particular, they are suited for reliable transportation or dry storage of commercial and industrial materials. They come in a range of different colours, offer space-saving storage and are easy to handle.

In corporate offices or home offices, where large quantities of waste paper normally accumulate, the wide range of DURABLE waste paper baskets and bins offer genuine storage solutions. The bins are available in a variety of materials such as high-quality plastic or sheet steel and they come in a range of attractive designs and colours which blend well with any surrounding.

Our GS-certified sheet steel waste paper bins come with fire extinguishing lids, making our products ideal for the safe disposal of cigarette ends. These bins are the ideal solution for all areas that are accessed regularly by the public. This extensive range of intelligent product ideas from DURABLE is completed with plastic buckets for the professional cleaning sector, and shopping baskets.

FOLLOWING NATURES EXAMPLE: TURNING WASTE INTO RECYCLABLES.

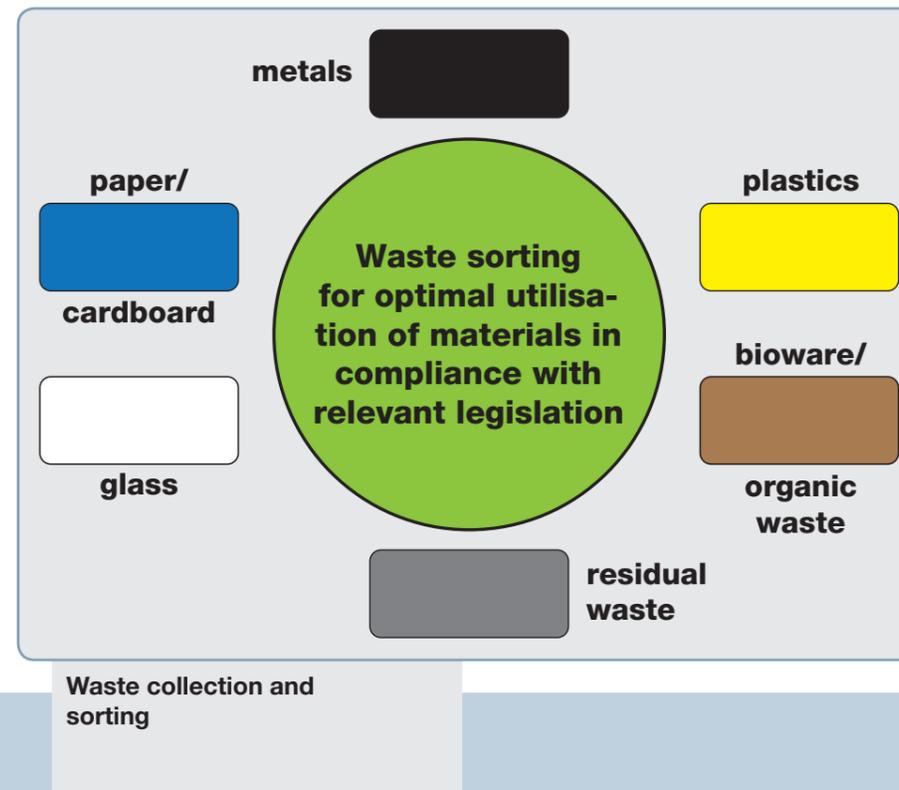

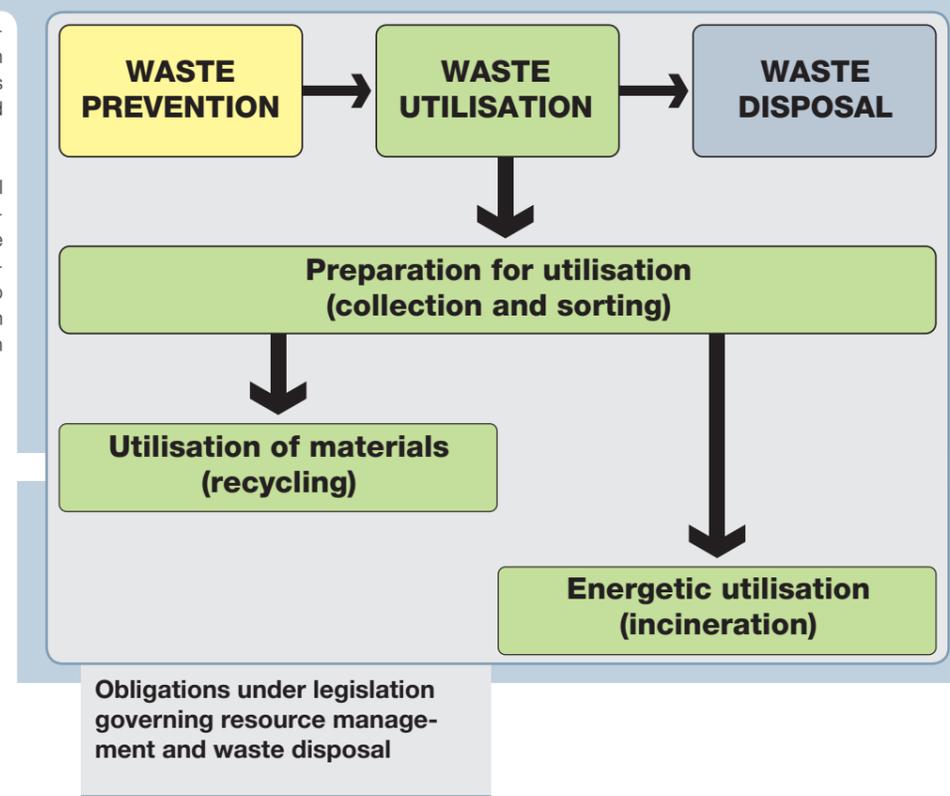

If you want to be successful in meeting the challenges of the future, you must act here and now. The continuous growth in the world's population causes a rising demand for goods. A rising demand for goods leads to higher productivity of the economy. Higher productivity invariably produces more and more waste and scrap materials – while our natural resources become short in supply.

Intelligent concepts which offer higher productivity and simultaneously minimise the exploitation of natural resources and the production of waste are the solution to this dilemma.

Here, the principle cycle of our economy is modelled on the cycle of natural substances, in an attempt to reuse recycled materials as much as possible and in a way that is ecologically and socially sound.

To implement this principle, a number of legal recommendations are in place. In the UK, recommendations primarily focus on the substance cycle management of products from manufacturing to recycling of the residual material. The top priorities here are avoidance of waste through efficient production processes and products with a long service life.

Another top priority is the recycling of residual materials. Here, the essential prerequisite for recycling is the collection and sorting of waste. Once the materials have been collected separately, they are either immediately returned to the production process for direct re-use – for example paper and glass – or returned to the substance cycle as secondary raw materials following sorting and further processing in waste treatment plants.

Residual materials that cannot be recycled economically but possess sufficient calorific value can be exploited energetically as incinerator fuels to generate process heat. This firstly reduces the consumption of primary energy sources such as coal, oil or gas, and secondly cuts the volume of waste to be disposed of through incineration to roughly one tenth.

In this way, the resources contained in waste materials are not lost, but become viable again either as secondary raw materials or as secondary fuels.

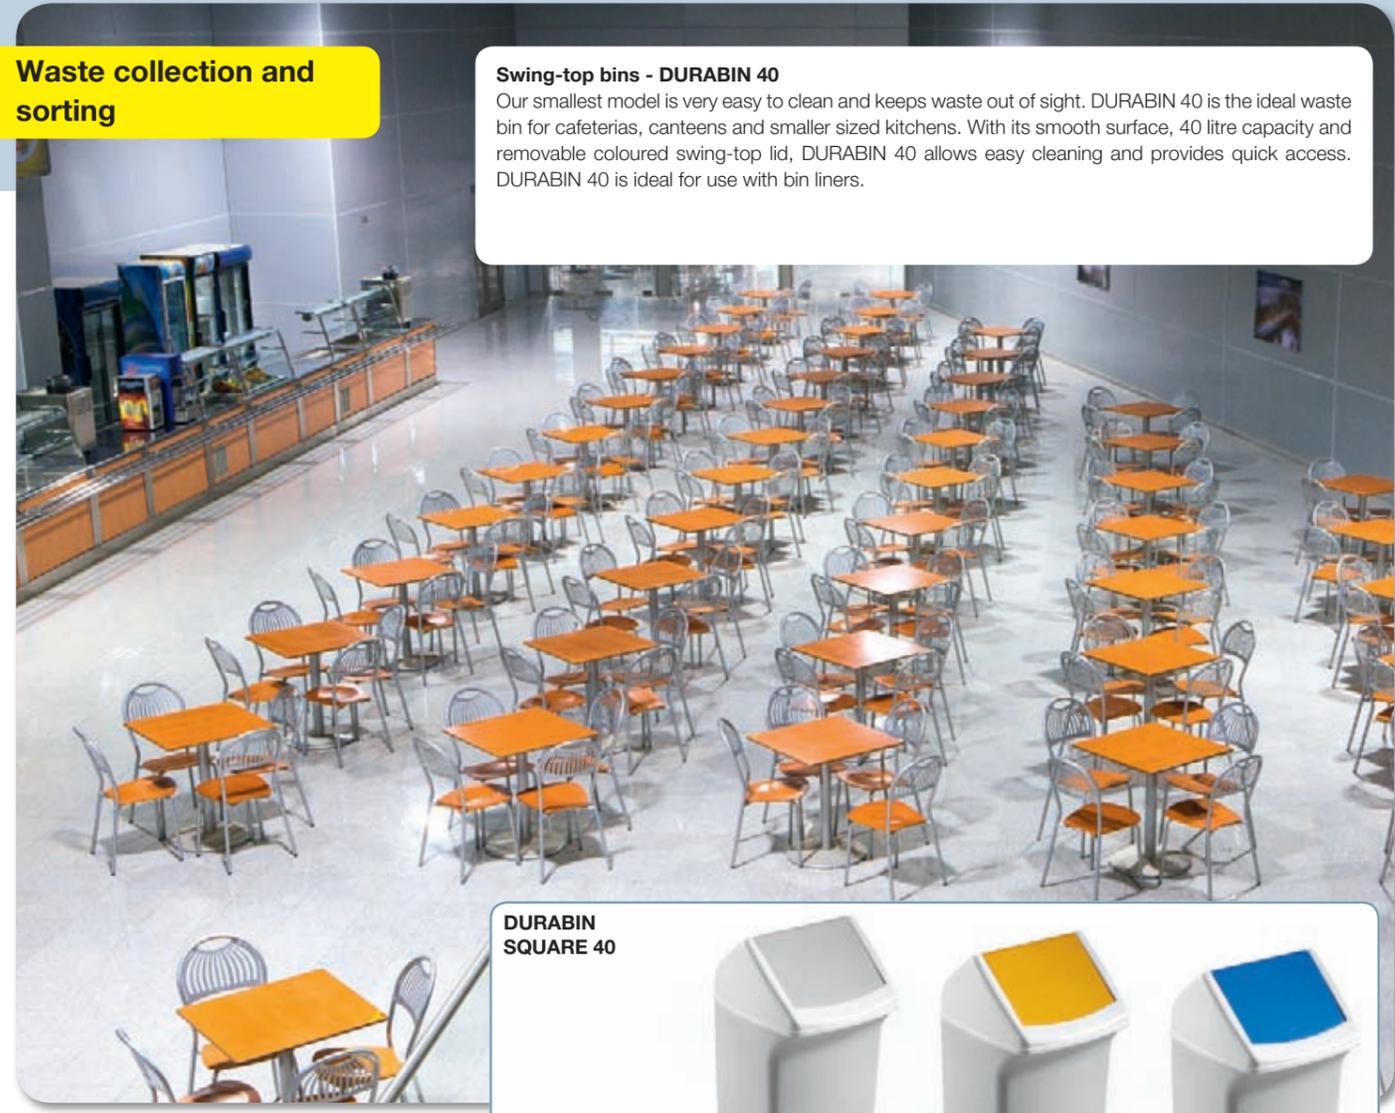

RELIABLE – ORGANISED – DURABLE. WASTE COLLECTION AND SEGREGATION WITH DURABIN.

When collecting and sorting corporate waste, an organised, systematic process is essential. DURABIN from DURABLE makes it easy to recycle and segregate waste, different colour bins allow the simple colour coding of waste streams.

DURABIN: waste management made easy.

Waste collection and sorting

Swing-top bins - DURABIN 40
Our smallest model is very easy to clean and keeps waste out of sight. DURABIN 40 is the ideal waste bin for cafeterias, canteens and smaller sized kitchens. With its smooth surface, 40 litre capacity and removable coloured swing-top lid, DURABIN 40 allows easy cleaning and provides quick access. DURABIN 40 is ideal for use with bin liners.

Medium sized rectangular bins - DURABIN 60
DURABIN 60 is ideal for use where larger amounts of waste accumulate or for locations where bins are not emptied regularly. The 60 litre capacity and tight fit coloured lid ensures that smells stay inside the bin. The rectangular shape of the DURABIN 60 allows several bins to be placed alongside one other in a space-saving way. Single and twin trolleys are available making it easier to transport several bins at one time.

Large capacity square bins - DURABIN 90
These spacious containers are perfectly suited for corporate use, allowing the segregation of large quantities of waste including bulky items. The DURABIN 90 is strong and durable for all types of applications. Whether it's scrap metal, oily cleaning rags, glass waste or packaging materials, everything can be collected, sorted and reliably fed into recycling process thanks to a choice of coloured lids. Single and twin trolleys are also available allowing transportation to the central waste collection point.

HIGH QUALITY. FLEXIBLE. SAFE. STORAGE AND TRANSPORTATION WITH DURABIN.

When safely storing corporate raw materials, it is important that the containers are of a suitable quality. DURABIN offers a wide range of high-quality plastic containers, available in different sizes and colours. DURABIN containers are particularly suited for storing free-flowing materials, including substances used in food production. The bins allow space-saving storage and reliable transportation with the use of trolleys.

Storage and transport

The practical solution - DURABIN 40

DURABIN 40 is ideal for storing up to 40 litres of materials. The plastic containers are especially robust and perfectly suited for all free-flowing substances or liquids, thanks to the practical front lipped edge. Now supplies can be stored safely and easily tipped into bottles or bags. The various different coloured containers and lids help to maintain order while reducing the likelihood of mixing-up bin contents.

DURABIN SQUARE 40

e.g. for powdered marble calcium carbonate
e.g. for green hematite
e.g. for azure blue phthalocyanine
e.g. for brilliant yellow benzimidazolone

DURABIN SQUARE SET 40 WITH TROLLEY

The sturdy storage professional - DURABIN 60
DURABIN containers are totally food safe. DURABIN 60 is therefore ideally suited for free-flowing and bulk materials, with its range of different colours these bins are also the perfect choice for storing materials used for food processing. Sugar, flour or freeze-dried fruit can be stored safely, including cold storage. Single and dual trolleys provide easy transportation. The rectangular shape enables space-saving storage.

DURABIN 60

e.g. for malted grain
e.g. for rye flour
e.g. for wheat flour
e.g. for vario grain

DURABIN TROLLEY DUO 60

e.g. for peeled sunflower seeds and rye flakes

Robust, large capacity storage - DURABIN 90

With a 90 litre capacity and space-saving, rectangular design, DURABIN 90 is designed to cope with most commercial or industrial challenges. Available in a wide range of colours, our largest container can be used for the storage and transportation of materials across a great variety of product categories and production processes. As an example the bins could store plastic and coloured granules or additives such as talcum and fibreglass used for processing plastics, for example PP, POM, ABS and PBT.

PRACTICAL YET FUNCTIONAL STYLE. WASTE PAPER BINS FOR OFFICE AND HOME USE.

The digital world is growing at a rapid rate, however the paper-free office is uncommon and huge quantities of waste paper accumulate in offices each day. DURABLE offers a wide range of waste paper baskets, in different designs and in sizes to suit your needs.

Designed for everyday use. Plastic waste paper bins.

Whether you choose QUADRO with its attractive design, the elegant and colourful TREND bins or the functional and economically priced BASIC version, our selection of waste paper bins feature truly modern, functional designs. Made from easy-clean, sturdy plastic material, they are perfect for storing everyday waste that is generated around the office.

WASTE BASKET TREND

WASTE BASKET QUADRO

WASTE BASKET BASIC

Contemporary, robust solutions. Metal waste paper bins.

These freestanding, sturdy waste paper bins have a generous capacity and elegant design. These metal bins come in square or classic circular design, and they are available in a range of colours including metallic silver, grey and black. Some models come with an attractive perforation pattern to suit modern environments.

WASTE BASKET STAINLESS STEEL ROUND 15

WASTE BASKET METAL ROUND 15/P 165

WASTE BASKET METAL SQUARE 18.5/P 165

Separating waste in a waste paper bin. Mini bin for recycling - DURABIN MINI.

Sometimes it is beneficial to sort waste while sitting at your desk or standing alongside the photocopier. In the office environment, the DURABIN mini allows easy segregation of waste on a smaller scale. The DURABIN mini clips inside standard size waste paper bins, providing a small container for a second type of waste. This allows paper clips and staples to be separated from all paper for example.

WASTE BASKET METAL ROUND 30

SAFETY AND SERVICE WITHOUT COMPROMISE. SOLUTIONS FOR PUBLIC AREAS.

The more stringent the demands on an environment with a high visitor frequency, the higher the quality standards for intelligent concepts must be. Therefore at DURABLE we have developed special product solutions for public areas which enhance safety and service to the public. For hotel lobbies, bank service halls, railway stations and airports – or smoking areas.

Here, fire protection is the first priority. Waste paper bins with fire extinguishing lids.
 When the call to board the next taxi, train or plane comes and urges people to hurry, many a cigarette lands in the waste paper bin, still alight. To ensure fire safety in public areas, waste paper bins with fire extinguishing lids are strongly recommended. DURABLE offers these, including models with an integrated ash tray made of high-quality, durable steel sheet with special safety features and in different sizes. The lids come with a special structure which extinguishes the fire source and offers preventive fire protection, which is guaranteed by the TÜV GS mark (which stands for "safety-tested").

Inviting entrances guaranteed. Waste paper bins with ash-tray attachment.
 The entrance area is a building's business card. This applies to corporate premises just as much as to hotels, railway stations and airports. To keep smoking areas and reception areas clean and tidy, DURABLE offers waste paper bins with ash-trays and wall ash-trays for interiors and protected outdoor areas in round or angled design and in different colours. For safe burn-out of the cigarette butts, the ash-tray attachment on the waste paper bin is filled with sand. Additionally, all tray inserts are easily detachable making trays easy to empty and clean.

Always there when they are needed. Semi-circle and corner design waste paper bins.
 Nothing is more tiresome than having to look for a waste paper bin, whether for newspapers, fast food packaging or small consumer goods. In public buildings it therefore makes sense to fasten semi-circular or corner waste paper bins to walls and corners where convenient to provide quick and practical waste disposal facilities for visitors and customers. Last but not least, umbrella stands for entrance and reception areas are also available.

- ▲ 23 silver
- 📦 1 piece

WASTE BASKET SAFE+

Round metal waste bins with extinguishing lid provide preventative fire protection in all areas. Its special self-extinguishing aluminium lid will disrupt the oxygen flow inside the bin and suffocate flames early on. These exceptional bins are certified from TÜV with the German GS-mark, a recognized crucial mark for product safety. Made of steel with scratch resistant epoxy polyester coating.

MORE PRODUCTS FOR TRADE AND COMMERCE.

Quality of materials is a top priority in the cleaning trade. The sturdy buckets from DURABLE are made of high-quality, heavy-duty plastics and are available in three convenient sizes. They offer high functionality together with ergonomic handling - attributes also present in our shopping baskets.

A clean proposition all round. Buckets from DURABLE.
 Buckets from DURABLE meet the high standards set for working in the professional cleaning sector. With capacities of 9.5, 14 or 28 litres and a choice of colours, they are accessories which can be integrated into commercially available cleaning transport systems. Of course they are also suitable for the safe transport of any liquids or solid materials. Buckets from DURABLE: ergonomical in handling and extremely robust in application.

Shoppers can buy with ease. Shopping baskets from DURABLE.
 Today, shopping baskets are a standard solution provided by every supermarket, for customers who only require a small number of items. For this purpose, DURABLE offers sturdy, attractive shopping baskets in two sizes: the smaller SHOPPING BASKET 19 and the larger SHOPPING BASKET 27. Matching trolleys allow easy transportation of stacked empty baskets and are available for both sizes.
